DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks, starting at page 10, filed May 26, 2004, with respect to claims 1-9 have been fully considered and are persuasive. The rejection under 35 USC 102e by Ramjee et al. has been withdrawn.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 13,14 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Agrawal et al. (Agrawal), U.S. Patent No. 6,490,259.

Regarding claims 13 and 18, Agrawal discloses a route updating method for micromobility network, wherein routers are connected in a tree configuration and radio base stations are connected to the routers in a lowest layer of said tree configuration, said route updating method comprising:

receiving, in router in a layer of said tree, a routing updating notification packet from a next lower layer (and lower order network) and updating said

routing in said router, said packet including an update reaching range defining a highest level in said tree connection to which said updating notification is to be transmitted (col. 4, lines 6-67 and col. 12, lines 14-45).

Regarding claim 14, Agrawal discloses the method of claim 13, further comprising:

determining, in said router whether said update reaching range requires that said routing updating notification packet be forwarded to a router in a next highest layer (col. 10, line 36 to col. 11, line 14).

Allowable Subject Matter

4. Claims 1-12, 15-17 and 19-25 are allowed.
